

Press Release

Better Basics Laborbedarf wins the "Best of Industry Award 2024" for Its "SmartIntegrate" Product Line in the Laboratory and Analytical Technology Category.

Dresden, 17 January 2025: Better Basics Laborbedarf, the developer and provider of modular laboratory organisation systems, has been honoured with the "Best of Industry Award 2024" for its "SmartIntegrate" product line in the Laboratory and Analytical Technology category. This prestigious award recognises outstanding innovations in the industry and is presented annually.

The "Best of Industry Award" stands out as finalists and winners are determined through a public voting process. In 2024, over 20,000 participants cast their votes across 15 categories. Better Basics impressed in the Laboratory and Analytical Technology category with its unique approach to enhancing efficiency and workplace organisation.

"We are honoured to have won the 'Best of Industry Award 2024'," said Mario Schneider, Managing Director of Better Basics Laborbedarf. "This recognition motivates us to continue developing innovative solutions that revolutionise the way laboratories operate. Our heartfelt thanks go to the many users and partners who have placed their trust in us. We would also like to congratulate our fellow finalists in the Laboratory and Analytical Technology category, DÜPERTHAL Sicherheitstechnik GmbH & Co. KG and Anton Paar Germany GmbH."

SmartIntegrate: Innovation for Efficiency and Safety in the Laboratory

With "SmartIntegrate," Better Basics has developed a modular system that sustainably improves organisation and efficiency at laboratory workstations. The flexible system can be used in fume cupboards, safety cabinets, as well as on laboratory benches and media supply units. The modular and adaptable design creates a safe, efficient, and ergonomic working environment. It offers numerous benefits, including additional storage surfaces, reduced walking distances, and less time required for workstation cleaning.

"With SmartIntegrate, we combine technological excellence in 3D printing with practical application to make laboratories significantly more efficient and safer," added Dr. Sebastian Stein, Production Manager at Better Basics Laborbedarf.

Through its innovative strength and commitment to improving efficiency, occupational safety, and laboratory work processes, Better Basics Laborbedarf has earned a reputation as a leading solutions provider. The company offers a wide range of modules for its "SmartRack®" and "SmartIntegrate" workplace organisation systems, enabling laboratory staff in the fields of chemistry, biology, biochemistry, food science, pharmaceuticals, and medicine to work on average 30% more efficiently and safely.

Better Basics Laborbedarf GmbH (www.better-basics-laborbedarf.de) is a company based in Dresden, Germany. Its mission is to reorganise laboratory workspaces with intelligent solutions to make them safer and more efficient.
